Lim Chee Kin

AI Solutions Architect | Enterprise AI and Business Systems

Kuala Lumpur, Malaysia | +60 11-2127 6330 | limcheekin@vobject.com

linkedin.com/in/limcheekin | github.com/limcheekin

PROFESSIONAL SUMMARY

Software architect with years of engineering experience, focused on enterprise AI, conversational agents and business workflow integration. Builds Python and TypeScript systems connecting document extraction, human approvals and accounting platforms. Brings hands-on architecture and delivery experience across retrieval-augmented generation (RAG), voice systems, cloud operations and distributed teams.

PROFESSIONAL EXPERIENCE

AI Solutions Architect

Daxonet AI Sdn. Bhd. | 2026 – Present

- **Claim Pilot:** Built expense claim intake through Teams and WhatsApp, document capture in a web portal, and claimant, verifier and approver reviews. Implemented Gemini receipt extraction, a FastAPI backend and React portal, with accounting/ERP integration for invoices and general ledger journals.
- **Trade Pilot:** Developed WhatsApp intake for purchase orders, delivery orders and item lists from messages, images, PDFs and Excel files. Combined document extraction with a Next.js review portal and AutoCount/Dynamod integration for quotations, sales orders and goods received notes, supporting admin review or automatic processing.
- **WareBot**: Delivered a conversational AI assistant for Warehouse Management System with natural-language stock queries, warehouse operations, SSE streaming and explicit confirmation before writes. Integrated locally hosted Qwen3.5 inference and delivered three Maestro UI test flows, a 21-assertion Newman API suite.
- **Smart HVAC Catalogue System:** Built a RAG backend matching air-conditioners to room type, size and usage. Combined PDF ingestion, dense and sparse retrieval, and product filters; implemented asynchronous ingestion, LLM evaluation and observability, with tests and evaluations in GitHub Actions.
- **Agentic AI Layer:** Architected multi-channel agents connecting accounting and business systems through APIs and role-restricted MCP tools. Implemented Claude Agent SDK workflows, Gemini-backed memory, Pipecat voice, and Telegram/WhatsApp access; integrated Google Workspace and Microsoft Graph using OAuth with PKCE and encrypted token storage.
- **Agent First Web Audit:** Developed a pipeline of four agent skills to audit websites for AI readiness, apply fixes and review changes.
- **AI Enablement:** Conducted company-wide training for functional consultants, engineers and support teams, plus monthly AI Ask Me Anything sessions for practical sharing and Q&A.

Principal AI Architect

Independent Consultant | 2021 – 2025

- **Enterprise Agent Integration:** Developed Project Concord, a Model Context Protocol (MCP) service for agent access to enterprise databases, with permission controls governing tool access.
- **Conversational Voice AI:** Built Talk To AI, integrating voice and web interactions through a speech-to-text, LLM and text-to-speech pipeline; optimized response latency.
- **Retrieval and Local Inference:** Designed RAG workflows using self-hosted embeddings and local inference to reduce reliance on paid embedding APIs. Used SurrealDB and local model deployments for client-controlled data processing.
- **Healthcare Agent Deployment:** Deployed a healthcare agent on GKE using Vertex AI and MongoDB Atlas with Private Service Connect. Configured Cloud Logging, latency/error alerts and horizontal pod autoscaling.
- **AI Evaluation:** Integrated Ragas to evaluate retrieval accuracy and generation quality, providing repeatable checks for RAG outputs.

Senior Java Tech Lead

DXC Technology | 2013 – 2020

- **Architecture and Team Leadership:** Led 6+ engineers across China, Europe and Malaysia to architect an enterprise analytics console using Java, Spring Boot, AWS and microservices.
- **Workflow Automation:** Collaborated with international stakeholders on a rule-based configurator for enterprise workflows; led root-cause analysis and resolution of production issues affecting an executive dashboard.
- **Engineering Standards:** Established code quality gates and design reviews, and mentored three junior developers.
- **Voice Automation Prototypes:** Prototyped conversational workflows using Amazon Connect and Amazon Lex.

Senior Java Tech Lead

Zurich Technology Services | 2012 – 2013

- **Claims System Reliability:** Resolved 60+ cross-service production issues in IBM WebSphere claims systems and strengthened testing and operational safeguards.

TECHNICAL SKILLS

Languages and Backend: Python, TypeScript, JavaScript, Java, SQL; FastAPI, Pydantic, Node.js, Bun, Spring Boot; REST APIs, webhooks and Server-Sent Events.

AI Engineering: Claude Agent SDK, MCP, Google Gemini, LiteLLM, OpenRouter, ragbits, Docling; multimodal document extraction, agent tool permissions, hybrid retrieval, Ragas and LLM evaluation.

Data and Storage: PostgreSQL/pgvector, SQLite (WAL, FTS5), SurrealDB, MongoDB Atlas, MinIO; SQLAlchemy and Alembic.

Frontend: React, Next.js, TypeScript, Vite, Tailwind CSS, ReactNative and Flutter.

Voice and Enterprise Integration: Pipecat, Gemini Live, Whisper, Kokoro; Teams Bot Framework, WhatsApp, Telegram, Google Workspace, AutoCount and Dynamod.

Security: OAuth 2.0 with PKCE, JWT validation, role-restricted agent tools and AES-256-GCM token encryption.

Infrastructure and Quality: Docker/Compose, Kubernetes, Linux, AWS, GCP/GKE, Nginx, systemd, Cloudflare Tunnel, Tailscale; Azure Repos, GitHub Actions, pytest and Vitest; OpenTelemetry, Prometheus and Grafana.

EARLIER EXPERIENCE

Independent Software Professional

Self-Employed | 2010 – 2012

- Built and maintained 10+ open-source Grails plugins, including Activiti, Form Builder and jQuery Validation UI, and supported users through community forums.

Senior Solution Consultant

Penril Datability (M) | 2008 – 2010

- Provided technical leadership for banking tenders securing RM6M and RM2M contracts with Kuwait Finance House Malaysia and Maybank; led a four-person customer portal delivery team.

Technical Lead

CMG Online | 2005 – 2007

- Led an eight-person international team delivering a RM2M hospital inventory system; defined development standards aligned with CMMI Level 3.

Earlier roles | 1999 – 2005: Software Consultant, Media Trend; Software Engineer, Siemens Multimedia; System Engineer, Online One Corporation and Tee Yam Holding.

EDUCATION

Bachelor of Science (Hons) in Computing (Multimedia Technology)
Staffordshire University, UK

Higher Diploma in Software Engineering; Diploma in Computing and IT
A.P.I.I.T
